## Young Visionaries

ATL Marathon 2021-22 celebrated the 75th anniversary of India's independence by honouring the country's resilience, diversity, and achievements. ATL Marathon 2021 was inspired by the idea of building a New India through the innovation and creativity of our young people. The Marathon was based on the 'Strategy for New India @ 75' document by NITI Aayog.

There were 55 teams representing Excel Public School at the ATL Marathon 2021-22. Among the top 300 teams in the nation, 23 teams represented our school. These selected 23 teams underwent SIP. The ATL Student Internship Programme (SIP) aims to institutionalise a system in which the students with the most original ideas are trained in business and entrepreneurship and allowed to work with industry incubators to pursue their ideas along with regular school education. The top 75 teams selected in the SIP included four teams from Excel Public School. These students will now be a part of the Seed the Entrepreneurship Programme, where they will get specialised coaching and mentorship for the following 8 to 10 months to assist them in advancing their innovations.

The teams are as follows.

1. Intelligent Driver System by Samartha Raghav, Samartha Venkat Narayan, Moulya Gowda
2. Overload Bridge Protection System by Chaitanya Poorna Satish, Anvith Venkatesh Shetty, Samanyu Dayanand
3. Low Carbon Material by Divya Satish, Sharanya M C, Tajnashree SS
4. Any Time Education by C B Swarna and Eshanvi M N.
