

HOF - Mentorship Excellence Awards

In the second iteration of the Misconception Master Contest, conducted by OPEN DOOR, a project started by young educators to encourage students to develop the habit of learning, Ms. Roshan Mary, our Biology teacher, and Ms. Umasindhu, our EVS teacher, came out on top among the first 90 participants from all over the country.

The programme helped deepen the knowledge of false assumptions hindering instructions during the teaching-learning process. It will also contribute significantly to the continuous endeavour to create a more conducive learning environment.
